- Verify Barrel Alignment:** Make sure the barrel is properly indexed and the gas port aligns correctly with the gas system.

Install the Gas Block and Gas Tube

- Gas Block Installation:** Slide the gas block onto the barrel, aligning it with the gas port.
- Secure Gas Block:** Depending on the design, tighten set screws or clamp it in place.
- Insert Gas**

Tube: Slide the gas tube into the gas block and through the upper receiver. Secure Gas Tube: Use the gas tube roll pin to lock it in place, ensuring proper alignment. Attach the Handguard Choose the Handguard Style: Free-floating or drop-in. Installation: Follow the manufacturer's instructions, often involving screwing or slipping it onto the barrel nut or delta ring. Mount Accessories: Once installed, you can add rails, lights, and grips. Install the Bolt Carrier Group and Charging Handle Insert Charging Handle: Slide into the upper receiver's charging handle channel. Insert BCG: Place the bolt carrier group into the upper receiver, ensuring it slides smoothly. Function Check: Cycle the charging handle to verify smooth operation.

Part 2: Assembling the Lower Receiver Install the Trigger Group Insert Trigger and Hammer: Place the trigger assembly into the lower receiver. Secure with Pins: Use the appropriate pins to hold components in place. Install Safety Selector: Insert the safety lever and detent, ensuring proper engagement. Add Spring and Detents: For the trigger, hammer, and safety. Install the Buffer Tube and Stock Prepare the Buffer Tube: Lightly lubricate the threads. Thread into Lower Receiver: Screw the buffer tube into the lower receiver's threading. Torque to Specification: Use the armorer's wrench, typically around 30-40 ft-lb. Install Buffer and Spring: Insert the buffer spring into the buffer tube, then the buffer. Attach Stock: Secure the stock onto the buffer tube, ensuring proper engagement. Install Magazine Catch and Release Insert Magazine Catch: Push into the designated hole. Secure with Spring and Detent: Place the spring and detent inside, then screw in the magazine release button. Test Functionality: Ensure magazines seat and release smoothly.

Final Lower Receiver Assembly Checks Install Pistol Grip: Secure with screw. Add any Accessories: Such as sling mounts or trigger guards. Function Test: Dry fire to verify trigger operation, safety engagement, and reset. Final Assembly and Function Testing Once both upper and lower assemblies are complete, it's time to put everything together and ensure the rifle functions correctly. Assemble the Rifle Attach the upper receiver to the lower receiver via the takedown pins. Insert a magazine. Ensure the rifle is unloaded during initial checks. Function Check Procedures Charge the Rifle: Pull back the charging handle to chamber a round (or dummy round if testing). Test Safety: Engage and disengage safety; verify trigger does not fire when safety is on. Dry Fire: Pull the trigger; it should release the hammer or firing pin, indicating proper function. Cycle the Action: Manually cycle the bolt carrier group to ensure smooth operation. Inspect for Proper Lockup: Confirm the bolt locks and unlocks correctly. Check Ejection and Extraction: If possible, perform live fire testing with dummy rounds to verify ejection pattern and chambering.

Maintenance and Troubleshooting Tips Building an AR-15 isn't just about assembly; ongoing maintenance ensures longevity and performance. Regular Cleaning Clean the barrel, bolt carrier group, and gas system after every 300-500 rounds. Use appropriate solvents, brushes, and patches. Lubrication Apply lubrication to moving parts, especially the bolt carrier, trigger group, and charging handle. Troubleshooting Common Issues Failure to Extract: Check gas system alignment, clean or replace the extractor. Stovepipe Malfunctions: Inspect for debris or weak ejector springs. Failure to Lock Open: Ensure magazine followers are functioning and magazine catch is engaging properly. Fouling and Wear: Regular cleaning reduces buildup that can cause malfunctions.

Legal Considerations and Safety Precautions Always adhere to local, state, and federal laws regarding firearm assembly and ownership. Ensure you: Use proper safety gear during assembly. Verify the firearm is unloaded before working on it. Consult professional gunsmiths if

unsure about any step. Keep the assembled rifle secured when not in use.
