- 1. Non-Direct Equivalents** Certain terms may not have exact counterparts or may carry different connotations.
 - "Facade": Though directly translatable as Fassade, in some contexts, it also refers to the front elevation, which may require clarification.
 - "Open-plan": Often translated as offener Grundriss, but the concept might vary culturally in architectural interpretation.
 - "Cantilever": Translated as Ausleger, but understanding its structural implications requires context.
- 2. Regional Variations** German architectural terminology varies across regions, affecting translation.
 - "Basement": In northern Germany, Keller is common, whereas in Austria, Untergeschoss might be used.
 - "Attic": Dachboden vs. Mansarde (French influence), depending on regional architecture.
- 3. Incorporating Technical Specifications** Translations should consider the technical context to avoid ambiguity. For instance, load-bearing wall as Trennwand (which typically means partition wall) can be misleading; the correct German term is Tragwand.
- 4. Avoiding False Cognates and False Friends** Some words look similar but differ significantly.

English Term	German Equivalent	Note
Palette	Palette Paletten (pallets), not Palette (color palette)	
Draft	Entwurf	Entwurf means draft or design, but Draft can also mean Entwurf or Luftzug (air draft)
