Common Topics Covered in Biology 2 Activity Manuals and Their Answers

Biology 2 often focuses on more advanced topics such as genetics, ecology, evolution, and physiology. Here are some common areas and sample questions with their answers:

Genetics
 Question: What is Mendel's Law of Segregation?
 Answer: Mendel's Law of Segregation states that during the formation of gametes, the two alleles for a gene separate, so each gamete carries only one allele for each gene.

Ecology
 Question: Define an ecosystem.
 Answer: An ecosystem is a community of living organisms interacting with each other and with their non-living environment, functioning as a unit through energy flow and nutrient cycling.

Physiology
 Question: Describe the process of photosynthesis.
 Answer: Photosynthesis is the process by which green plants, algae, and some bacteria convert light energy into chemical energy stored in glucose, using carbon dioxide and water, with oxygen as a byproduct. The general equation is $6\text{CO}_2 + 6\text{H}_2\text{O} + \text{light energy} \rightarrow \text{C}_6\text{H}_{12}\text{O}_6 + 6\text{O}_2$.
